Plan Information:

- This plan is not a Legal Survey
- Created and maintained using Quantum Geographic Information System (QGIS)
- The plan can be up-dated as required using the GIS and will be identified by a unique version number and date.
- Plan projection: Universal Transverse Mercator - Zone 17
- Projected grid distances are 0.9997 x the ground distances.
- Property lines building and several features based on Legal Survey information provided by E. Sperling, O.L.S.
- Compiled by Dynamic Mapping

Lot Numbering System Explained

The first number and letter identify a Locator Block

- "1" is the top row number starting on the top and increasing downward
- "A" is a column letter starting on the west of the property and increasing eastward

The 3rd, and possibly 4th, number character is the lot number in the Locator Block

- Standard numbers are 1 to 10 in two sub-columns, numbered top to bottom, then left to right.
- A small case "m", appended at the end, indicates a "modified" or non-standard lot location or non-standard lot dimensions
